Summary

Results-driven Senior Software Engineer with 7+ years of experience architecting and delivering scalable, high-availability web applications in fast-paced product environments. Deep expertise in modern frontend ecosystems including Angular (2–17), React.js, Vue.js, Vue, and TypeScript, backed by strong full-stack capabilities in Node.js and MongoDB. Proven leader in frontend architecture, performance optimization, advanced state management, and building reusable design systems that accelerate development while maintaining exceptional code quality. Recognized for technical ownership, cross-functional leadership, and consistently delivering mission-critical solutions that drive measurable improvements in performance, reliability, and user experience.

Core Competencies

- Frontend Development:** Angular (7–17), React.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Angular Material, Bootstrap, Responsive Web Design, Cross-Browser Compatibility, Component-Based Architecture
- Backend Development:** Node.js, NestJS, Express.js, RESTful API Development, API Integration, MongoDB, CRUD Operations, Full-Stack Application Development
- State Management & Data Flow:** RxJS, Angular Signals, NgRx, Redux Toolkit, Asynchronous Programming, Reactive Programming
- Technical Leadership & Delivery:** Technical Leadership, Solution Design, System Architecture, Project Estimation, PRD Generation, Stakeholder Management, Team Mentoring, Code Reviews, Agile/Scrum Methodologies
- AI-Assisted Development:** Claude AI, GitHub Copilot, Cursor, Specification-Driven Development (SDD), AI-Augmented Software Development, Prompt Engineering
- Testing & Quality Assurance:** Jasmine, Karma, Jest (Basic), Unit Testing, Debugging, Code Reviews, Code Quality Improvement, Performance Optimization
- Tools & Platforms:** Git, GitHub, Jira, Postman, VS Code, Firebase, Monorepo Development
- Mobile & Cross-Platform:** Ionic Framework, Flutter (POC Development)

Work Experience

Technical Lead (Full Stack) Codecraft Technologies	03/2026 to Current India
- Lead full-stack development initiatives using Angular, Vue.js, Node.js, and NestJS, driving architecture decisions and ensuring scalable, maintainable solutions. - Spearheaded a code quality improvement initiative across a large monorepo, introducing coding standards, refactoring strategies, and review processes to improve maintainability and developer productivity. - Architected and delivered a financial domain MVP utilizing Claude AI and a Specification-Driven Development (SDD) approach, accelerating development cycles while maintaining high-quality deliverables. - Led project estimation, technical planning, and PRD generation for a report-generation platform, collaborating with stakeholders to define requirements, scope, and delivery timelines. - Leveraged AI-powered development tools including GitHub Copilot, Cursor, and Claude to enhance development efficiency, code quality, and documentation workflows. - Mentored development teams, conducted code reviews, and provided technical guidance on frontend and backend architecture, best practices, and delivery standards. - Collaborated with product owners, business stakeholders, and engineering teams to translate business requirements into technical solutions and execution plans.	
Senior Software Engineer Ness Digital Engineering	01/2024 to 02/2026 India
- Led frontend development of scalable enterprise applications using Angular 17, Vue.js, TypeScript, Tailwind CSS, and Angular Material. - Architect and develop reusable, high-performance UI components to enhance maintainability and development speed. - Implement advanced state management with RxJS and Angular Signals to streamline async data handling and optimize performance. - Design and integrate RESTful APIs, ensuring efficient client-server communication, robust error handling, and secure data exchange. - Improve application performance, accessibility (WCAG standards), and cross-device responsiveness, resulting in enhanced user experience. - Contribute to architectural discussions, technical design reviews, and enforce best practices in frontend architecture and clean code principles. Collaborate in Agile/Scrum teams, participating in sprint planning, backlog grooming, and peer code reviews.	

Engineer I	02/2022 to 01/2024
Getir	India
- Developed scalable full-stack features using React.js, Node.js, Express.js, and MongoDB for high-traffic delivery management systems. - Designed and optimized responsive dashboards and operational interfaces used in large-scale logistics workflows. - Built and consumed RESTful APIs, improving backend-frontend integration and reducing data-fetch latency. - Enhanced frontend performance by refactoring components, optimizing state management (Redux Toolkit), and minimizing unnecessary re-renders. - Implemented modular, reusable component libraries to improve consistency and maintainability across applications. - Participated in code reviews, technical design discussions, and performance optimization initiatives. - Worked closely with product managers, designers, and backend engineers in a fast-paced Agile environment.	

Software Development Engineer III	10/2021 to 02/2022
Simplilearn	India
- Developed and maintained feature-rich Angular applications supporting global e-learning platforms with high user engagement. - Integrated and stabilized REST APIs with robust asynchronous handling using RxJS. - Improved UI consistency, accessibility, and cross-browser compatibility across multiple learning modules. - Refactored legacy components to improve maintainability, performance, and scalability. - Contributed to production releases, bug fixes, and continuous improvements within Agile sprints.	

Software Engineer	08/2018 to 10/2021
Moonraft Innovation Labs	India
- Built scalable enterprise web and hybrid mobile applications using Angular (7+), Ionic Framework, and TypeScript. - Designed component-driven frontend architecture and developed reusable UI libraries across projects. - Implemented real-time data synchronization using Firebase, enabling dynamic user experiences. - Developed cross-platform Proof-of-Concept (POC) mobile applications using Flutter. - Participated in end-to-end SDLC activities including requirement analysis, solution design, development, testing, and deployment. - Optimized UI performance and ensured responsive design across web and mobile platforms.	

Certifications

- Angular & NodeJS - The MEAN Stack Guide - Introduction to Game Development - Introduction to GitHub Copilot - Microsoft Copilot Bootcamp, 2025-02-01 - Principles of Game Design	
--	--

Education

Bachelor of Engineering (B.E.): Computer Science	2018
Visvesvaraya Technological University	India
